

# Swiss narrow gauge – Rhaetian Railway

## RhB – Sliding door wagon Haik-qy 5163

### Prototype:

Since 1970 RhB uses four-axled sliding-door-wagons.

In 1980/81 the company bought further 25 vehicles. Ten of them were insulated and heatable, and three had an extra refrigerator. With a special switch one can change the current, so all vehicles can be used on the whole RhB-track.

The Haik-qy 5163 was set in motion in 1981. The capacity is at 26,0t.

The wagon had an advertising for "Coop" for many years, which was lost at the end of the century. Now, wagon is aluminium, with red lettering.
