

## Pirata Novelties presented at N-Convention

The Italian small series manufacturer Pirata was, as every year, represented at the European N-Scale Convention in Stuttgart with its own stand. This year again interesting novelties were announced for the fan of Swiss narrow-gauge railways and first specimen were presented.

Art.-Nr./item-no./produit-no.

2nd class coach of the Arosa Express of the RhB  
Pirata model based on a modified Kato EW I  
available for N and Nm  
Kato close-coupling

In 1969 came five second class cars type EW I for the Arosa line in operation. On the occasion of the conversion to alternating current, the two B-cars 2319 (and later the 2315) received a special paint in blue with alpine flora motifs and the Arosa logo. Over a period of 10 years (1997 to 2007) it operated as a train without surcharge with several similarly designed and modernized coaches between Chur and Arosa.

### RhB Station Building Surava

**PI-10600.N**

Art.-Nr./item-no./produit-no.

**PI-10600.N:** RhB Aufnahmegebäude der Albula-Linie, Station Surava, Pirata-Modell, Lasercut-Fertigmodell

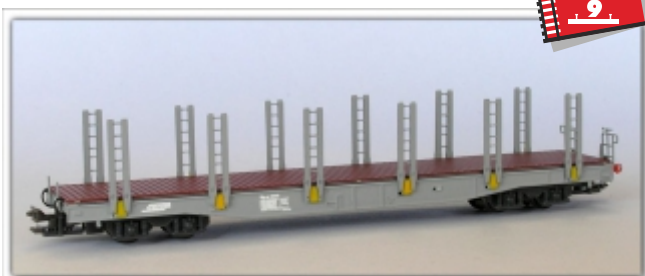

Station building of the Albula line of the Rhaetian Railway  
Pirata lasercut model, ready assembled  
suitable for track N and Nm

For the from 1897 built Albula line a type of intermediate station was developed, which was constructed as wooden building with squared timber. With a footprint of 6x15m and a ridge height of 7.35m, they are slightly larger than those of the previously built lines. The freight room was optionally placed at the right or at the left. Even today, the Surava station building presents itself to the visitor as quite original in its substance, despite the changes made over the years by the expansion of the roof.

**PI-9102.Nm:** RhB Sp-w 8280, Rungenwagen mit Einzelungen, Spur Nm, mit Kato-Kurzkupplung, Pirata-Modell

We have already presented the stake cars in one of our last newsletters.

The vehicles are now sold out from the factory. Pirata is currently producing another series. We receive a small quantity with vehicle numbers specially made for us.

## Order and Availability

Pirata has decided to make a second production run of the very successful stake car. The models are in production. We anticipate delivery in the first quarter of 2019. For fast buyers, we are again offering an early-bird-price. Please order in time, as we will not stock a large quantity of these models.

On the basis of the very successful Einheitswagen I of Kato-company, a conversion to a restaurant car and a repainting to the Arosa Express are planned. The restaurant was already in Stuttgart as first specimen to be seen and gives us a very realistic impression.

Both models will be available in 2019. Pre-orders will be accepted. We announce prices as soon as known.

For the first time, there is now an already built up station building modeled on the Rhaetian Railway in laser cut technology. The model shown at the Stuttgart fair gives us a neatly made impression. We expect delivery in the first quarter of 2019. Please order on time, as we will do not stock the model.

The models are offered for N and Nm. The current prices can be found on our website.

If you always want to receive an e-mail in advance to be informed as soon as possible, please contact us for our newsletter. Many Thanks.
