technical information

chassis milled from the full brass block with Faulhaber motor and flywheel
motor shafts are ball bearing mounted
drive on all four axes
no need for traction tires
current collection from all eight wheels
all electrical connections are on top of the frame
exact to scale 1:160
MicroTrainsLine coupling for Nn3 Narrow Gauge
model pantographs, without function
space for a digital decoder under the roof hood
minimum radius 195mm, track width 6,5mm

This handmade model can only be used on 6.5mm narrow gauge tracks (Z-gauge). A gauge change to 9mm is not possible.

features

Model in classic red design, after conversion to rectangular headlights.
Extensive lettering on the side and front walls. Currently, we are still checking whether it is technically feasible and optically meaningful to have the lettering raised on some locomotives (surcharge).
Free view through driver's cab and engine compartment.
Detailed representation of the roof area, including warning arrow on the pantograph.

delivery / dates of delivery

We have received from N-Track a first part of the ordered kits for the Ge4/4II. Further kits are expected to follow during the third quarter of this year.
Production will start in May. The first models will be delivered in June. Production and delivery will take place throughout the year.
The advertising locomotives presented this year will follow after the pre-ordered red locomotives have been delivered. Probably not before the end of the year.
Delivery will take place in the order in which the order is received.
All chassis are numbered by N-Track. Additionally we will provide all bodies with a serial production number. The enclosed certificate informs you about all the product details.
The pre-ordered models will be invoiced at a preferential price. Updated order confirmations will follow in the next days.
For new orders please expect 12 to 18 months delivery time.
We thank all our customers for their almost endless patience.
