

Novelties Presentation Sliding wall wagon VOLG

Dear friends of the Swiss narrow gauge railways,
we are pleased to be able to deliver the 2018 presented sliding wall wagons with VOLG motifs within the next days. The colourful models have become a real eye-catcher.

Our info presents the novelty to you in detail.

Yours

The Haikqq-uy 5162 to 5164 series includes the following motifs Vrin, Ardez and Vella.

Haiqq-tuyz 5173 bis 5175 series includes the following motifs Sent, Fläsch and Landquart.

The two model series differ in some striking details:
above the models with modern, large cooling unit and handwheels to open the side walls, ...
below the models with the old, still rectangular cooling unit and opening brackets for the side walls. And, additional sockets are fitted to the rear wall.

Prototype

Since 1970, the RhB has been using the first sliding wall wagons for the rational management of freight traffic. A larger series was purchased in 1980/81. Including 3 vehicles with cooling unit on the platform. The prototypes were put into operation as Haik-qy 5162 to 5164 and have a load weight of 26.0t.

Further vehicles followed in 1992, including 4 vehicles with a cooling unit. The prototypes were classified as Hai-qy 5173 to 5176 and have a payload of 30.0t.

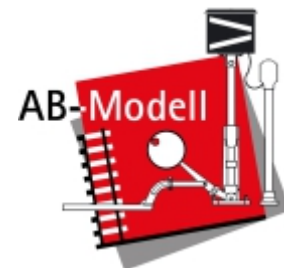

In addition, all wagons are fitted with a mains power changeover switch to enable the sliding wall wagons to be used freely on the entire rail network.

From 2017, VOLG (Verband Ostschweizerischer Landwirtschaftlicher Genossenschaften) has had a total of six sliding wall wagons fitted with attractive advertising foils, thus promoting the beauty of the canton with the slogan "Volg. At home in the village. In ... at home".

All models are delivered with individual numbering. The two-axle container wagons with VOLG containers will follow at a later date.

Model

The models consist of a large number of nickel silver parts which we assemble, paint and mark by hand in our workshop. As usual, the metal wheel sets are mounted on top bearings in the smooth-running bogies of the Lok-Schlosserei company and ensure excellent running of the wagons. Coupling with the Z-coupling of MicroTrainsLine.

The models run exclusively on 6.5mm tracks and cannot be regauged.

Many details have been contrasted in colour. The newly developed end walls have free standing handlebars. The modern cooling unit is a modified injection-moulded part. Neither the doors nor the roof can be opened. The models are not children's toys.

Delivery

We have produced all pre-ordered models in the last months. At the moment we are still working on the final assembly and packaging of the sliding wall wagons. Delivery is expected in the first week of September.

All customers who have placed a pre-order will be contacted by us separately and informed about the delivery of the models and, if necessary, the delivery conditions will be discussed.

New orders will be placed within the usual delivery periods.

Thank you very much for your patience.
