Novelties Presentation

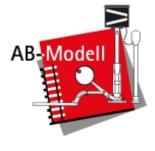

Sliding Door-Wagon Güterbahn

Dear friends of the Swiss narrow gauge railways,

the Rhaetian Railway uses the sliding door-wagons also for self-promotion and presents the "Bündner Güterbahn" with an attractive photo subject. Exactly twenty years ago we were able to present our first model to you, coincidentally exactly this wagon! One more reason to take a closer look.

We wish you a lot of reading pleasure.

price/item-# EUR 189,00 Nm-001.2

All models are delivered with individual numbering.

Prototype

The 5136-5140 series sliding door wagons were commissioned in 1992 with aluminium-coloured side walls and striking red lettering.

In the spring of 2018, the 5139 car received a new side wall sticker with RhB's own advertising on the subject of freight railways and an attractive photo motif of a freight train on the Landwasser viaduct. In addition, the model was converted from a lever lock to a handwheel lock.

Retrospective

In November 1999 - after almost 2 years of development we presented our first handcraft model, the Hai-v 5136-5140. The perfect construction comes from the Lok-Schlosserei and is still current. Even today, after 20 years, the article Nm-001.1 can still be ordered and is manufactured on request in the four available desired numbers 5136 to 5139.
