

## Novelties Announcement MDS with further advertizing locos

Dear friends of the Rhaetian Railway,  
after last year's abstinence, MDS has created more advertising locomotives for you this year. In today's newsletter we summarise the available data.  
We hope you enjoy reading it  
Yours  
AB-Modell-team

### MDS-Modell

Three attractive new promotional models are coming from Swabia, for even more colour on the RhB tracks.  
As usual, these are one-off editions and the number of pieces is limited.  
We offer the models only in standard gauge.  
All locomotives can be ordered in analogue technology, but also digitised or with sound.

#### RhB Ge4/4II 618 edelweiss MD-60013.N/D/S

Art.-Nr./item-no./produit-no.

Express locomotive Ge4/4II 618, red  
with advertising motif "fly edelweiss"  
N-model with standard N-coupling

MD-60013.N: RhB Ge4/4" 618 rot, Werbemodell „fly edelweiss“, Spur N (9 mm), mit Rapidokupplung, MDS-Modell

#### RhB Ge4/4II 612 Burkhalter MD-60014.N/D/S

Art.-Nr./item-no./produit-no.

Express locomotive Ge4/4II 612, yellow  
Advertising model of the Burkhalter Group  
N-model with standard N-coupling

MD-60014.N: RhB Ge4/4" 612 gelb, Werbemod. Burkhalter-Gruppe, Spur N (9 mm), N-Kupplung, MDS-Modell

### Model Design

The MDS models have a metal frame for adequate vehicle weight. The body is injection moulded from plastic. Many details are etched and additionally applied, including the resistance cover on the roof and the front circulation plate. Further plastic injection moulded parts refine the visual image. Movable plastic pantographs are mounted on the roof, which are without function.

Inside there is a very well controllable bell-shaped armature motor, which makes the model start smoothly. It drives all axles of the model. Two traction tyres are fitted for sufficient tractive power in model railway operation.

The models are equipped with a 3/2 tip lighting, which changes automatically with the direction of travel.

The bodies are extensively painted and printed according to the prototype.

The locomotives are available ex works in analogue version. Digital and digital with sound versions are available on request. The loudspeaker is located under the resistor cover on the roof. A subsequent digitalisation is possible by exchanging the circuit board.

Equipped with the N-standard coupling, the models can be put into operation directly. The coupler heads can be exchanged for Kato close couplings.

We offer the models exclusively for N gauge (= 9mm track)! A conversion to Nm is not possible.

### Prices

MDS has not yet told us the prices. These should be similar to the last announced models.

We will inform you via newsletter as soon as possible when the models become available, of course stating the price.

#### RhB Ge4/4II 619 Südostschweiz MD-60015.N/D/S

Art.-Nr./item-no./produit-no.

Express locomotive Ge4/4II 619, blue  
Advertising model Südostschweiz  
N-model with standard N-coupling

MD-60015.N: RhB Ge4/4" 619 blau, Werbemod. Südostschweiz, Spur N (9 mm), N-Kupplung, MDS-Modell

### Novelties 2022

This year's novelties bring even more colour and variety to your model tracks. The yellow Burkhalter and the light/dark blue Südostschweiz locomotive are likely to become real eye-catchers in your collection.

If you didn't get your chance with Kato's edelweiss locomotive, you should quickly get your hands on the MDS machine. As usual, the series are limited in number of pieces.

We will keep you informed about the availability of these and not yet released models.

We publish current prices and delivery dates on our website.

In order to always be up to date, we recommend that you, subscribe to our newsletter.
