

Novelties Delivery Ge4/4II of Rhaetian Railway

Dear friends of the Rhaetian Railway,
we are pleased to present you the final version of the new locomotive variants of the Ge4/4II with round headlights. We start with the red models, which are close to completion.

We present a total of five red locomotives in today's newsletter.

The models will be delivered to the pre-orderers shortly.

We hope you enjoy reading our newsletter.

No fewer than five "Little Red Ones" are added to the programme. On the left, a get-together of the new products.

The RhB's Ge4/4II, which looks similar to the SBB Re4/4II, is often referred to as a Bonsai locomotive.

Nm-241.1: RhB Ge4/4" 617, rot, Wappen Ilanz, Handarbeitsmodell, Faulhabermotor, Schwungmasse, Decoder

RhB Ge4/4II 617 „Ilanz“ Nm-241.1

Art.-Nr./item-no./produit-no.

Nickel silver handmade model of the RhB loco Ge4/4II.
Red version with dark grey apron, RhB logo and lettering
Municipal coat of arms Ilanz
Model with round headlights

Nm-242.1: RhB Ge4/4" 627, rot, Wappen Reichenau-Tamins, Handarbeitsmodell, Faulhabermotor, Schwungmasse, Decoder

RhB Ge4/4II 627 „Reichenau“ Nm-242.1

Art.-Nr./item-no./produit-no.

Nickel silver handmade model of the RhB loco Ge4/4II.
Red version with dark grey apron, RhB logo and lettering
Municipal coat of arms Reichenau-Tamins
Model with round headlights

Nm-243.1: RhB Ge4/4" 629, rot, Wappen Tiefencastel, Handarbeitsmodell, Faulhabermotor, Schwungmasse, Decoder

RhB Ge4/4II 629 „Tiefencastel“ Nm-243.1

Art.-Nr./item-no./produit-no.

Nickel silver handmade model of the RhB loco Ge4/4II.
Red version with dark grey apron, RhB logo and lettering
Municipal coat of arms Tiefencastel
Model with round headlights

Nm-244.1: RhB Ge4/4" 614, rot, Wappen Schiers, Handarbeitsmodell, Faulhabermotor, Schwungmasse, Decoder

RhB Ge4/4II 614 „Schiers“ Nm-244.1

Art.-Nr./item-no./produit-no.

Nickel silver handmade model of the RhB loco Ge4/4II.
Red version with dark grey apron, RhB logo and lettering
Municipal coat of arms Schiers
Model with round headlights

The model series are strictly limited and come with a certificate.

All five variants are currently still available for order.

We publish current prices on our website at www.n-schmalspur.de.

To stay up to date, please subscribe to our newsletter.

Thank you very much.

RhB Ge4/4II 630 „Trun“ Nm-245.1

Art.-Nr./item-no./produit-no.

Nickel silver handmade model of the RhB loco Ge4/4II.
Red version with dark grey apron, RhB logo and lettering
Municipal coat of arms Trun
Model with round headlights

technical informationen

undercarriage milled from the full brass block
with Faulhaber engine and flywheel mass
drive on all four axles
no traction tyres
current collection from all eight wheels
scale 1:160
MicroTrainsLine coupling for N-narrow gauge
model pantographs, without function
digital decoder MX616 from Zimo installed
minimum radius 195mm, gauge 6,5mm
unlit

Prototype

To replace mainly older locomotive types, the RhB purchased four-axle universal locomotives with 2,300 hp. The technically highly sophisticated machines completely fulfilled the expectations and almost reached the performance of the considerably larger Ge6/6II alone. In 1972, locomotives 611 to 620 were delivered in green livery with chrome lettering, and in 1984 a further 13 machines (621 - 633) were delivered in red livery with a new logo.

Digitalisation

The Ge4/4II is equipped with the powerful Zimo decoder MX616. This has been programmed to work best on analogue operated layouts. Please note: For optimal operation we recommend transformers with stabilised output voltage without half-wave starting.

The locomotive starts at approx. 6 to 7 volts, because the decoder needs a certain minimum voltage. When the voltage is increased, the locomotive runs normally on the controller, as you know it from analogue locomotives.

In analogue mode you cannot and do not have to change the set parameters of the decoder. We have set everything for you so that you can start driving directly.

Digital drivers can adjust the settings in the decoder if desired. To do this, please refer to the enclosure with the locomotive with the instructions for the adjusted CVs.

On request, the locomotives are available without a decoder.

Model

The model gets the classic red paint scheme as applied to the locomotives of the second construction series ex works, and for the originally green machines in the course of the 1980s. They are equipped with the round headlights from the delivery period.

The extensive lettering is on the side and end walls. Clear view through the driver's cab and engine compartment.

Detailed representation of the roof area, including warning arrow on the pantograph.

Delivery / Delivery dates

We have already presented the models as a novelty in 2021, but can only now start with the delivery. It continues to be very difficult to obtain the desired components within usual delivery times.

The pre-ordered models are in final production and will be delivered by about the middle of August. The customers will be contacted separately by email.

Delivery will be made in the order in which orders are received.

The chassis have been numbered by N-Track. In addition, all chassis are provided with a consecutive production number. The certificate enclosed with the model informs you about the details.

Pre-ordered models are charged at a preferential price. For new orders, the regular price and a delivery time of 12 to 18 months apply, as we will not produce the next tranche of Ge4/4II models until 2023.

We thank all customers for their patience.

A newsletter on the green locomotives will follow in a few days.
