

Novelties Delivery

Pirata Coaches

Pirata has delivered various models, at the same time we were able to get hold of freight cars from the Italians. The following models are immediately available from stock, only while stocks last!

We wish you much reading pleasure

Yours

Pirata-Models

Pirata uses Kato vehicles from their RhB programme for the models presented on this page, paints and partially rebuilds them. The Pirata models are therefore fully compatible with the Kato models and can be converted to the N-standard coupler. The installation of interior lighting is also possible. We offer the Pirata models for both N and Nm gauge.

All models are available from stock. Only while stocks last.

We publish current prices and delivery dates on our website.

To stay up to date, we recommend that you subscribe to our newsletter.

Orders

Pirata has delivered the models listed above. We have filled up our stocks.

Pre-ordered models are reserved. Stock beyond that is available immediately.

Only while stocks last!

**** NEW *** NEW *** NEW *** NEW *** NEW *** NEW *** NEW ***

Please note that due to Pirata's extremely long delivery times, we are no longer accepting orders in excess of our stock. Interested parties who can no longer be served will be kept on an internal list and will be contacted by us by email as soon as further vehicles are available. You will not receive an order confirmation!

Stock Sale

Pirata Freight Cars

As we already announced in our newsletter of 05.05. of the year, we were able to buy back some Pirata stake cars from the first series from a customer at Intermodellbau. These models are in stock and immediately available. Only while stocks last!

We have tested and test-driven all models. They are in excellent and absolutely mint condition and are therefore sold as NEW. The prices correspond to the original prices of 2018.

We converted the vehicles to Nm in 2018 with the help of the MDS bogies. All models are equipped with Kato close couplings. On request, we can include the original Pirata bogies with N-standard couplings as spare parts. The N-coupling can also be mounted in the MDS bogie. We carry out the conversion back to N gauge by means of a wheelset exchange.

Four-axle freight wagon with single stanchions metal handcrafted model with 3D-printed stanchions and etched brake handwheel, completed with 3D printed parts

Vehicle number Sp-w 8280
2 pieces available

Design

The stake cars are the Italian small-series manufacturer's own designs. They consist primarily of etched sheet metal, supplemented by 3D printed parts.

The models are very solidly stored in a sturdy box with precisely cut foam parts.

Colouring and lettering correspond to the current appearance on the RhB network.

By cutting off the end walls on the PI-9101.N/Nm you get additional rolling stock numbers for PI-9100.N/Nm.

If you have a need for decals for re-labelling, please contact us.

Following Kato's example, the models are also made in Japanese N-scale 1:150 and run on 9mm tracks. Models re-gauged by us roll on 6.5mm tracks!
