

Novelties Presentation MOB - Golden Pass-Train

The Compagnie de Chemin de Fer Montreux-Oberland Bernois, MOB, connects Lake Geneva with the Bernese Oberland. The same rolling stock was purchased years ago together with the RhB. Reason enough to check the appropriate models for conversion. Read all about our latest vehicles.

To the delight of the visitors we have had presented the brand new Golden Pass train of the MOB on our companies diorama Wilderswil at the Nuremberg Toy Fair 2018.

The MOB locomotive will be completely redesigned based on the existing Kato model.

We add to the roof fine etched fan mounts, a modified cable routing, as well as an apparatus box. The pantographs are turned according to the model by 180°. Part of the ventilation slots visible from the outside are removed in order to get it as close to prototype as possible.

Golden Pass-Loco KT-021.3N/Nm/Nm-208.2

Art.-Nr./item-no./produit-no.

based on Kato Ge4/4III:

Reconstruction of the roof on MOB (direct current railway)

Repainting and decorating with Golden Pass motif

Inclusion of the apron in the color scheme

golden lettering on the front and side

two numbers available: Ge4/4 8002 and 8004

Execution as a track N-locomotive, running on 9mm-N tracks, with standard N-couplers

or

Design as a regauged Nm locomotive, for 6.5mm narrow gauge, with Kato-close-couplers

Furthermore we offer:

Execution as metal handwork model, for 6,5mm-Nm-

tracks, with two Faulhaber motors with flywheels,

finest scale version with new constructed roof, with

MicroTrainsLine Nn3-narrow gauge couplers

Golden Pass and Golden Panoramic Line of MOB

Decalsets for do-it-yourself

By popular request, we also offer decalsets for the decoration of corresponding Kato vehicles into the MOB models.

Please indicate when ordering how many vehicles you would like to redesign and which class designation (for the standard I unit) you wish.

Each coach set is sold with a set of decals to cover the route boards on the side walls. Optionally, you could guide your models to Montreux, Zweisimmen or Lenk, or label them as "Reservé" (reserved).

Colors and tools are not included - as usual.

The decalsets include an extensive, illustrated assembly instruction for easy mounting.

You will also need a print and paint remover (for example DLE-90 from Lux-Modellbau). Finally, we recommend a matt finish.

Decalset Golden Pass

KT-021.3D

Art.-Nr./item-no./produit-no.

Decalset for one locomotive

Decoration as Golden Pass-loco for Kato Ge4/4III

NOVELTY 2018

Decalset Golden Panoramic

KT-021.4D

Art.-Nr./item-no./produit-no.

Decalset for two EW I

Decoration as Golden Panoramic Line for Kato EW I

Please state when ordering how many vehicles of the first and second class you want to redecorate.

NOVELTY 2018

Hints for coupling

The locomotive is usually delivered with the N standard coupler, the standard coaches I-models with the Kato-close-couplers. In this form of delivery, the models can not be connected directly. That's why we have added two N-couplers to the coach set to convert two bogies.

A short-coupling kit for the locomotive is available. Please order if interested.

Of course, we can assemble the desired couplers for a small fee on the model.

features	price/item-no.

This set is available in combination with a coach set KT-021.4 (A/B) only.

NOVELTY 2018

Services and Accessories

As usual, we offer a range of accessories and services around the MOB models.

In the accessories area, these are primarily the decalsets, but also replacement couplers for both the friends of the N-standard coupler, as well as for the fans of the Kato-close-coupling. If you should miss something, just send us a short email.

As services, the regauging of your delivered models are offered. Please be sure to coordinate in advance the delivery of your models with us by email. In addition, the vehicles can be equipped with travelers or train drivers, install an interior lighting or already mount the appropriate coupler.

RTR-models / delivery dates

The pre-ordered models will be produced in August / September and will be sent to customers after completion, after prior contact.

New orders will be accepted and subject to the delivery times, which we will inform you on the order confirmation. The decalsets are available at short notice from stock (September 2018).

Further MOB-Models

The advertizing-loco will not stay permanently in the program and is planned as a special model for the near future. Demand of our customers determines the further models.

It is also planned to offer the sky blue / ivory-colored Einheitswagen I in response to our customers in new variants.

In addition, the series of MOB vehicles will continue in N and Nm. Attractive models are already in preparation.

Current prices are published on our website.

We will keep you updated on new developments on the website too. On request, we also add you to our novelties-newsletter (by eMail).
