

Novelties Presentation Novelties from MDS

More locomotives from MDS arrived earlier than expected. These are models that were announced for 2019, as well as novelties of this year! You will find all the details in our newsletter today.

We wish you much reading pleasure.

AB-Modell-team

RhB Ge4/4II 617, 50 Jahre LGB MD-60006.N

Art.-Nr./item-no./produit-no.

Ge4/4II 617 advertising „50 Jahre LGB“
with Faulhaber-type armature motor, fine etched parts
available analogue, digital and with sound
N gauge (9mm) with N standard coupling

MD-60006.N: RhB Ge4/4" 617, 50 Jahre LGB, Spur N
(9 mm), mit Rapidokupplung, MDS-Modell

The advertising locomotives of the company RE-Power (until 2010 Rätia Energie AG) have become real eye-catchers. The two red machines show different motives from winter and summer on the side walls. They advertise with the slogan "Unsere Energie für Sie" or in Rhaeto-Romanic "Nossa energia per Vus" ("Our energy for you").

MD-60008.N: RhB Ge4/4" 615, RE-Power Winter, Spur N
(9 mm), mit Rapidokupplung, MDS-Modell

RhB Ge4/4II 615, RE-Power MD-60008.N

Art.-Nr./item-no./produit-no.

Ge4/4II 615 advertising „RE-Power“ winter
with Faulhaber-type armature motor, fine etched parts
available analogue, digital and with sound
N gauge (9mm) with N standard coupling

No fewer than six new locomotives of the Ge4/4II type have arrived at our company. Of these, three are models that were already announced for 2019 and could not yet be delivered.

In 2018, Märklin had the Ge4/4II 617 equipped with a motif commemorating the 50th anniversary of the Lehmann-Groß-Bahn (LGB), which has been part of the group since 2007. On the side wall, besides the emblem and the anniversary number, four RhB anniversary locomotives are shown, which were in the delivery program of the garden railroaders.

Available now are the Ge4/4II 615 with winter motif and the Ge4/4II 617 with summer motif. While the winter picture has been advertising RE-Power without interruption since 2010, the summer picture 2018 had to make space for the LGB advertising. Both motifs are pin sharply applied and a real feast for the eyes. Also the lettering on the front was not forgotten.

MD-60009.N: RhB Ge4/4" 617, RE-Power Sommer, Spur N
(9 mm), mit Rapidokupplung, MDS-Modell

RhB Ge4/4II 617, RE-Power MD-60009.N

Art.-Nr./item-no./produit-no.

Ge4/4II 617 advertising „RE-Power“ summer
with Faulhaber-type armature motor, fine etched parts
available analogue, digital and with sound
N gauge (9mm) with N standard coupling

Technic

The locomotives are technically unchanged.
The Faulhaber-type armature motor ensures balanced driving characteristics and starts without jerking.
Unfortunately there was no room for a flywheel mass.
All motives are optionally available with decoder or with decoder and sound ex works.

The locomotive is still not convertible to narrow gauge. As soon as we have found an attractive price, we will inform you by newsletter.

We will be happy to convert the coupler to the Kato close coupling for you.

Digital drivers please order a digitalised or sound locomotive from us immediately, as we do not carry out any digital conversions or installations in our workshop.

Optic

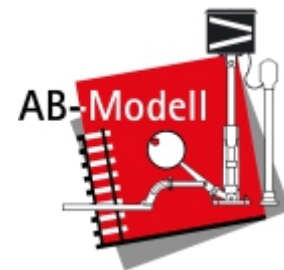

Optically the model corresponds to the last delivered locomotive with now dark injected plastic pantograph. This looks much more prototypically than the first series with the silver pantographs.

The fine etched parts round off the harmonious overall picture. Another positive aspect is that all detailing parts are already mounted ex works and do not require any rework by the model railroader.

For refinement we also offer side mirrors (only printed) and front sockets (missing).

We publish current prices on our website at www.n-schmalspur.de. To be always up to date please register for our newsletter.
Thank you very much.

Novelties Presentation Novelties from MDS

MDS has announced three more locomotives for the year 2020 and promptly delivered them. A special spot of colour is the green TRAVECO locomotive, which has been undergoing a repainting process since 2017. Since 2018, the RhB-Club has been in existence, with many additional information pages on the web about the Rhaetian Railway, and the matching club locomotive. Last in the bunch is the Hakone locomotive, which refers to the partner railway Hakone-Tozan-Railway in Japan and has been wearing the corresponding colour scheme since 2010.

Deliveries

Of the analog locomotives we have some models from stock available at short notice. We usually reorder additional requirements within a few days. Digitalized and sound-equipped locomotives are only procured on order and are not in stock.

Due to current contact restrictions, we only ship twice a week by DHL parcel.

We publish current prices on our website at www.n-schmalspur.de. To be always up to date please register for our newsletter. Thank you very much.
